

We claim:

Laws have to be written easy understandable! Police Acts have to be clearly to protect peoples' rights!

The permission for surveillance should only be given for specific and in fact dangerous people!

Violation of fundamental rights have to be as difficult as possible for the police. They have to be controlled very strictly!

An independent institution to control the police has to be established!

We should not sacrifice democracy and freedom for so called „security“!

Weitere Infos gibt es auf sogenannte-sicherheit.org

Wenn ihr euch im Bündnis engagieren wollt, kontaktiert uns auf der Webseite. Und sonst: Los geht's! Organisiert Widerstand gegen das geplante Polizeigesetz in M-V!

Sprecht SPD und CDU in ihren Wahlkreisbüros an, schickt einen Brief an Schwesig und Caffier, verbreitet die Infos! Dieser Flyer steht auf deutsch, persisch, arabisch, englisch und französisch zum Selber-ausdrucken auf der Webseite.

SOGENANNT SICHERHEIT

Bündnis gegen die Verschärfung des Polizeigesetzes in M-V

Prevent the new Police Act in MV!

The government of Mecklenburg-Vorpommern (MV) is right now working on exacerbating the Police Act. Police Acts give the regulation in all federal states, what the police is allowed to do in investigations and operations. In MV this Act is called „Sicherheits- und Ordnungsgesetz“, short: SOG. The draft for the law will be in the parliament soon.

Still we can prevent it!

The new Police Acts, which came up in many federal states of Germany right now, give more power and possibilities to the police to violate the rights of „suspicious“ people. Still there is no independent institutions to control the police. False suspicion or i.e. racist investigations usually don't have any consequences for the policemen/women.

englisch

What is wrong with the draft for the new Police Act for MV?

The police will get the right to violate peoples' fundamental rights in many points. In a democratic state it is important, that the police can not just do whatever they want. Their decisions have to be controlled. In Germany this means, that the police usually needs the permission of an independent judge, before they violate the fundamental rights of people.

The new law will make it easier for the police to get this permission after the violation more often. Additional it is planned, that the police is allowed to keep evidences, which incriminate themselves. It will also be easier to monitor people. In the public discussion they usually give „terrorism“ as the reason for this. Statistics show, that mostly drug dealers and thieves are targeted.

What is written in the draft for the new law?

- "Anhaltspunkte"/clues: Police does not have to give facts to the judge any more, why they want to monitor someone. It will be enough, when they give „actual clues“ - or to name it honestly: When they suppose someone is dangerous.

- „Zufälliger Kontakt“/random contact: The Act says someone does not have to plan a crime him/herself to be monitored. It will be enough to have random contact with someone: Friends, family, room or flat mates.

- Video surveillance: Police will be allowed to videograph big events. Open Air Concerts, football-stadiums are the beginning – surveillance of the freedom of speech on demonstrations are not far.

- „Staatstrojaner“/spying digital data: It will be easier for police to put surveillance-software on computers and mobile phones of „suspicious people“. It will be easier to hide cameras and microphones in the flats of „suspicious people“.

Exacerbated Police Acts in Germany are worrying us, because they give more power to the police. The assumptions, who might commit a crime is strongly connected to the worldview of single policemen/women. An assumption is not a rational criteria and can not be controlled. This is opening the door for police arbitrariness and democracy depleting.

Stop violations of fundamental rights of the Refugees!

In the past years several exacerbations of the Asylum and Residence Acts have taken place. The reason therefore is also often said to be „security and order“. The fundamental rights of Refugees and migrants are already now heavily violated. We have to assume, that these techniques and procedures are practiced here and can later be used on every person. Examples:

- In general the police does not ask for search warrants from independent judges before they enter the flats of Refugees at deportations. A court in Hamburg judged in February, that this is a violation of Article 13 of German Fundamental Law. Don't accept this in MV! Appeal against it!

- Since 2017 BAMF is allowed to copy and evaluate the full data of the mobile phones of asylum seekers. Nowadays this is like the police enters a flat and takes every single piece of paper, letters and foto albums to copy them. The own mobile phone contains very private and personal data.

- In the draft for „Geordnete-Rückkehr-Gesetz“ the Ministry for Interior Affairs wants to bring people into deportation jails, who have never committed a crime. The criteria who can be imprisoned will be widened that much, that they are applicable on nearly every Refugee.

Unfortunately not many people are interested in the rights of the Refugees. We should not accept this! Let us fight for the rights of every single person!

For our freedom! For our Rights! Think big!

Control-Insanity and Democracy-Depleting are not only taking place in Germany. Many of our friends have seen and experienced things, that shall never become reality in Germany again: Al Sisi is holding power in Egypt for lifetime – Assad is torturing in underground jails – human rights activists endure lashing and death penalty in Iran every day – opposition in Honduras is violently oppressed – and thousand more attacks on freedom.

When we fight for democratic laws in Germany, we always fight for democracy and human rights all over the world. We want a life in freedom and dignity for alle people!
